p21-Activated Kinase 1 Regulates Microtubule Dynamics by Phosphorylating Tubulin Cofactor B

Ratna K. Vadlamudi, Christopher J. Barnes, Suresh Rayala, Feng Li, Seetharaman Balasenthil, Stevan Marcus, Holly V. Goodson, Aysegul A. Sahin, Rakesh Kumar

Departments of Molecular and Cellular Oncology, Molecular Genetics, and Pathology, University of Texas M. D. Anderson Cancer Center, Houston, Texas, USA; Department of Chemistry and Biochemistry, University of Notre Dame, Notre Dame, Indiana, USA

Volume 25, no. 9, p. 3726–3736, 2005. Page 3735, Fig. 7A and B: Some lanes for the tubulin cofactor B Western blot contain gel images in which the intervening lanes that were spliced out were not properly indicated. Dotted lines in the corrected figure below indicate that these samples are from different gels. There is no change in the figure legend or text.
