
VOLUME 285 (2010) PAGES 23590–23597

DOI 10.1074/jbc.A110.139469

Regulation of NF- κ B circuitry by a component of the nucleosome remodeling and deacetylase complex controls inflammatory response homeostasis.

Suresh B. Pakala, Tri M. Bui-Nguyen, Sirigiri Divijendra Natha Reddy, Da-Qiang Li, Shaohua Peng, Suresh K. Rayala, Richard R. Behringer, and Rakesh Kumar

VOLUME 285 (2010) PAGES 6980–6986

DOI 10.1074/jbc.A109.065987

Stimulation of inducible nitric oxide by hepatitis B virus transactivator protein HBx requires MTA1 coregulator.

Tri M. Bui-Nguyen, Suresh B. Pakala, Divijendranatha Reddy Sirigiri, Emil Martin, Ferid Murad, and Rakesh Kumar

The publisher of the Journal of Biological Chemistry is issuing an Expression of Concern to inform readers that questions have been raised with the corresponding author's institution regarding some of the data and conclusions in the articles listed above.

This Expression of Concern is solely intended to notify readers for informational purposes. It is not a statement regarding the validity of the data. The Journal of Biological Chemistry will provide additional information as it becomes available.

Authors are urged to introduce these corrections into any reprints they distribute. Secondary (abstract) services are urged to carry notice of these corrections as prominently as they carried the original abstracts.
