DOI 10.1074/jbc.A113.604444

Solution structure and antiestrogenic activity of the unique C-terminal, NR-box motif-containing region of MTA1s.

Rajesh R. Singh, Kumaralal Kaluarachchi, Mingzhi Chen, Suresh K. Rayala, Seetharaman Balasenthil, Jianpeng Ma, and Rakesh Kumar

PAGE 25620:

The original *inset* in Fig. 6 did not originate from the correct experiment. It has been replaced by the results from a new staining experiment from the same paraffin blocks. The replacement does not change the results or interpretation of the data.

Authors are urged to introduce these corrections into any reprints they distribute. Secondary (abstract) services are urged to carry notice of these corrections as prominently as they carried the original abstracts.
